Statistics South Africa's latest Consumer Price Index.

Statistics South Africa's latest *Consumer Price Index* for May 2025¹ shows that **Headline inflation was 2,8%**, and for the **lowest expenditure quintiles 1-3 it is 4,6%, 4,1%, and 3,7%** respectively. **CPI Food inflation was 4,4%** (for CPI Food & NAB it was 4,8%, we use the figure excluding non-alcoholic beverages). STATS SA's *Producer Price Index* for April 2025² shows **Agriculture was 4,7%**, of which, *Products of crops and horticulture* was **7,0%**, and *Live animals and animal products* was **1,2%**.

Workers

The National Minimum Wage is R28,79 per hour, R230,32 for an 8-hour day, and R4 836,72 for an average 21-day working month.

In June 2025, with **20 working-days**, the maximum National Minimum Wage for a General Worker is **R4 606,40**. Workers work to support their families. The wage workers earn is not just to sustain themselves alone, it is used to support the entire family. For Black South African workers, **one wage typically must support 4 people**. **Dispersed in a worker's family of 4 persons, the NMW, is R1 151,60 per person – this is below the upper-bound poverty line of R1 634 per person per month.**

The June 2025 average cost of a basic nutritional food basket for a family of four persons is **R3 809,26** (See page 6 of June 2025, *Household Affordability Index*).

On our calculations, using Pietermaritzburg-based figures for electricity and transport, and the average figure for a minimum nutritional basket of food for a family of four, puts electricity, and transport, taking up **57,4%** of a worker's wage (R2 642,97/R4 606,40). Food is bought after monies for transport and electricity have been paid for or set aside (leaving **R1 963,43** – for food and everything else), and so in June 2025, PMBEJD calculates that workers' families will **underspend on food by a minimum of 48,5%** (having R1 963,43 left over after transport and electricity have been paid, and with food for the month costing R3 809,26). **In this scenario there is no possibility of a worker being able to afford enough nutritious food for her family.** If the entire R1 963,43 all went to buy food, then for a family of 4 persons, **it would provide R490,85 per person per month. This is below the food poverty line of R796** (See page 8 of June 2025, *Household Affordability Index*).

Women and children

In June 2025, the average monthly cost to feed a child a basic nutritious diet was **R970,89**. Over the past month, the average cost to feed a child a basic nutritious diet **decreased by R8,77 (-0,9%)**. Year-on-year, the average cost to feed a child a basic nutritious diet **increased by R35,80 (3,8%)**. See page 6 of June 2025, *Household Affordability Index*.

In June 2025, the **Child Support Grant of R560** is **30%** below the **Food Poverty Line of R796**, and **42%** below the average monthly **cost to feed a child a basic nutritious diet (R970,89)**.

Household domestic and personal hygiene products

The June 2025 *Household Domestic & Personal Hygiene Index* **increased by R11,96 (1,2%)** month-on-month. Year-on-year the household domestic and personal hygiene products index **increased by R11,81 (1,1%)** bringing the total average cost of basic household domestic and personal hygiene products to **R1 041,47** in June 2025 (See page 5 of June 2025, *Household Affordability Index*).

The cost of basic hygiene products is high. These products are part of the monthly groceries, and compete in the household purse with food. These products are essential for good health and hygiene; and dignity.
